## Value the contents of your home

# Appraise the contents of your home

To be fully insured it is important to know the exact value of your home contents and belongings. This leaflet will make it easy to estimate the value of everything you have accumulated over the years!

Follow our advice to fully protect the contents of your home:

- Note the current value of your home contents in this leaflet.
- If you are a tenant: only indicate the items that belong to you.
- Think about updating your inventory regularly (e.g. goods purchased, marriage etc.) and sending it to your advisor. That way, you will never be surprised in the event of a claim.
- Take photos of your belongings as they are in your home, with close-ups of serial numbers and the exact models, gather together the purchase invoices, valuations of your valuables, receipts, guarantees, etc. that may be used as supporting documents and to remind you of everything you owned in the event of a claim.
- It is also important to save your inventory in a safe place, in a safe or in a cloud and send a copy to your advisor. This will save you a lot of hassle when it comes to making a claim!
- The cover of valuables is limited to a certain amount, ensure that this adequately covers the value of your belongings.

Indicate the current value of your contents room by room:
